Senior SRE | DevOps Lead | Linux & Cloud Infrastructure

Senior Site Reliability Engineer and DevOps Lead with 15+ years of experience designing, operating, and improving Linux-based infrastructure across on-premise, hybrid, and cloud environments. Strong background in incident response, automation, observability, backup strategy, infrastructure operations, and stakeholder coordination. Experienced with AWS, Azure, Terraform, Ansible, Docker, Kubernetes, GitLab CI/CD, Prometheus, Grafana, Loki, and PagerDuty. Known for leading reliability initiatives, improving operational efficiency, documenting complex systems, and supporting production environments with 24/7 on-call responsibilities. Experienced with Docker-based production workloads and exposure to Kubernetes-based environments.

TECHNICAL SKILLS

Operating Systems: Linux, Red Hat (RHEL), CentOS, Debian, Ubuntu, FreeBSD, Solaris, Windows Server

Cloud & Infrastructure: AWS, Azure, VMware, Proxmox, KVM, Xen, Libvirt, NetApp, Synology, Veeam, Bacula

Infrastructure as Code & Automation: Terraform, Ansible, Bash, Shell Scripting, Cron, GitLab CI/CD

Containers & CI/CD: Docker, GitLab CI/CD, pipelines

Observability & Incident Management: Prometheus, Grafana, Alertmanager, Loki, ELK Stack, Elasticsearch, Logstash, Kibana, Nagios, Zabbix, PagerDuty

Networking & Security: DNS, VPN, SSL/TLS, Load Balancing, Active Directory, Okta, SSO, Cisco, SonicWall, CheckPoint, Fortinet

Databases & Web Platforms: PostgreSQL, MySQL, MariaDB, MongoDB, Apache, NGINX, LAMP, LEMP, Plesk, cPanel

Collaboration: Jira, Confluence, Slack, Google Workspace

Languages: Spanish (Native), English (Advanced B2-C1), Dutch (A1, currently learning)

PROFESSIONAL EXPERIENCE

GeoPhy, Netherlands

SRE Team Lead | 2022 - Present

- Led SRE initiatives that improved operational efficiency by 20% through automation, process standardization, and improved incident handling.
- Managed reliability-focused epics and technical roadmaps, translating business requirements into actionable engineering work.

- Coordinated production infrastructure changes with engineering, product, and business stakeholders, ensuring delivery alignment and risk visibility.
- Improved observability and incident response workflows using Prometheus, Grafana, Loki, Alertmanager, and PagerDuty.
- Drove root cause analysis and technical documentation practices to reduce recurring incidents and improve knowledge sharing across teams.
- Supported 24/7 production operations for Linux-based, cloud, and hybrid infrastructure environments.

Linux System Administrator / SRE | 2020 - 2022

- Administered Linux servers and network infrastructure across CentOS and Debian environments, ensuring production continuity and service availability.
- Managed on-site and off-site backup operations, improving recovery readiness and infrastructure resilience.
- Supported Docker-based production applications, troubleshooting runtime, deployment, and performance issues.
- Assisted customers with Linux integration, performance optimization, and production troubleshooting.
- Supported AWS, GitLab, PostgreSQL, and PagerDuty-based incident workflows for critical production issues.

SoftwareONE, Santo Domingo, DR.

Solution Specialist | 2019

- Sold Azure and Office 365 solutions, acting as a technical evangelist at conferences and webinars.
- Developed relationships with local partners, optimizing available resources.

Codemera, Santo Domingo, DR.

Linux/DevOps Engineer | 2019

- Managed hosting infrastructure, SSL, and domain management.
- Provided customer support for setup issues, website migration, software settings, and troubleshooting.

CloudBrix LLC, New York, NY, USA

Linux Engineer | 2018 - 2019

- Maintained a large infrastructure with over 500 devices, applying security patches daily.
- Worked with LAMP Stack, Plesk (CloudLinux), VMware, Veeam, and Fortinet.

Caribe Media S.A., Santo Domingo, DR.

System Engineer | 2016 – 2018

- Administered AWS, Azure, ELK Stack, LAMP (CentOS), LEMP (CentOS), and VMWare.
- Led the migration from Microsoft Exchange 2013 to Office 365 for over 300 inboxes.

Theorem Creations LLC, Santo Domingo, DR.

IT Manager | 2013 – 2016

- Managed network and server infrastructure, and provided IT support within budget constraints.
 - Implemented Linux PBX / Asterisk (CentOS) and internet access policies, and managed VPN access.
-

EARLIER CAREER

Network Manager, Supermercados Bravo | 2011 - 2013

Software Engineer, NewTech S.A. | 2010 - 2011

VoIP Support, EDESUR Dominicana | 2009 - 2010

Network Operator Analyst, DGTEC | 2007 - 2009

EDUCATION AND TRAINING

Bachelor of Science, Computer Science

Universidad Autónoma de Santo Domingo, Dominican Republic | August 2018

Certifications:

- AWS Certified Solutions Architect Associate | 2023 - Expires 11/2026

Previous Certifications:

- Linux Foundation Certified System Administrator (LFCS) | 2021
- Azure Administrator (AZ-103) | 2019
- Cisco Certified Network Associate (CCNA R&S 5.0) | 2015

Training:

- CISSP Training | 2017
 - Fundamentals of Quality Standard ISO 9001:2008 | 2015
 - Leadership Principles and Effective Staff Supervision | 2014
-

VOLUNTEERING EXPERIENCE

Founder and Volunteer Instructor, Linux Dominicana | 2015 - Present | <https://linuxdominicana.org/>

- Founded and grew an open-source community focused on Linux education and knowledge sharing.
- Organized free Linux and open-source workshops, reaching hundreds of participants.
- Delivered talks, mentorship, and community events on Linux administration and open-source adoption.
